

# Farm Plow Down

## Cover Crop Mix

- Soil Building
- Nitrogen Fixation
- Huge Biomass
- High Forage Value
- Nutrient Management
- Break Soil Compaction

### A New Powerhouse

Cover crops offer many benefits for agriculture productivity and sustainability by increasing soil biodiversity and organic matter. This in turn reduces runoff and nutrient leaching and provides habitat to beneficial insects.

Farm Plow Down Mix covers all your bases for soil health. In addition, it produces large amounts of highly nutritious biomass, shading out weeds and providing forage for livestock and wildlife.

#### Mix Components:

FIXatioN Balansa Clover

#### % In Mix:

40%
