

Forever Turf Mix

225 NW Frontage Rd
Ft. Collins, CO 80524
888-603-7333 or 970-419-3309

Green

*50% Perennial Ryegrass
30% Tufted Hair-grass
20% Kentucky Bluegrass*

- *Drought tolerant*
- *Excellent wear tolerance*
- *Exceptional dark green color*
- *Maintains growth during winter*

Mowing height down to 1/2 inch

Seeding rate: 3 lbs per 1000 sq. ft.

Over seeding rate: 2 lbs per 1000 sq. ft.

***SOIL:** Grows in deep, moisture-saturated, poorly drained soils, or well-drained, well-developed soils. It withstands soil saturation for fairly long periods of time. It is tolerant to salt and alkalinity.*

Tufted hair-grass is resistant to toxic wastes, and is therefore often used in the reclamation of mining sites. It is also recommended for the reclamation in sub alpine, alpine, and mountain meadow habitats.

FOREVER GREEN is a blend of three of the top rated turf grasses.

KENTUCKY BLUEGRASS is a top rated NTEP variety. Magnificent variety for all geographical regions, high turf density throughout the year, disease resistance and great for sod production.

PERENNIAL RYEGRASS exhibits

rapid germination and is exceptionally fast establishing, has early spring green up and has excellent salt tolerance.

Tufted hair grass is resistant to fire, the roots are rarely damaged by even hot intense fires. It can be used in many diverse situations in both shaded and full sun while maintaining an excellent aesthetic appearance.

All three of these grasses are very fine leafed with exceptional dark green color. They all have a low mowing tolerance and **FOREVER GREEN** does not go dormant in the winter. In the winter months when sports fields and heavily used golf tees experience the most stress, **FOREVER GREEN** continues to grow offering optimum performance.
