Quick Green Grass Mixture

- *Persistent turf cover under low maintenance*
- *Adaptable to wide range of soil conditions*
- *Adapts well to sun or shade.*

*35% Creeping Red Fescue
35% Perennial Ryegrass
30% Kentucky Bluegrass*

Sow rate:

5- 10 pounds per 1,000 sq. ft.

Overseeding rate:

4 pounds per 1,000 sq. ft.

That's exactly what this special formulated mix does-- **Quick Green**. If you want a tough durable, low maintenance, low water use, turf mix, **Quick Green** is it. **Quick Green** is the mix of choice by CU for all their turf areas.

Quick Green Grass Mixture is a low cost mixture of desirable turf grasses which give satisfactory perfor-

mance on general turf areas. Perennial ryegrass provides early germination and soil stabilization until the other grasses in the mixture develop. Kentucky bluegrasses provide lasting turf quality. Creeping red fescue offers ground cover at low maintenance levels and adds shade tolerance to the mixture.
