Thermal Blue

Texas Hybrid Bluegrass

- *High drought tolerance*
- *Quickly recovers from drought stress*
- *Great Appearance*
- *Low Maintenance*

Seeding rate:

5 lbs per 1,000 sq. Ft.

3 lbs per 1,000 sq. Ft. Overseeding

Thermal Blue Texas Hybrid Bluegrass provides bluegrass characteristics of rhizomatous growth and fine-dense turf with added heat and drought tolerance. This grass seems to grow better the warmer it gets in the summer. The hybrid bluegrasses appear to maintain more active summer growth, which translates into better traffic tolerance and ability to recover from traffic injury. **Thermal Blue** has an extensive root system which can enhance heat and drought resistance. A dense root system will also improve traffic tolerance, ability to recover from wear, and will improve footing in a sports turf application. The ability to sustain growth and vigor with less irrigation results from deeper roots and its excellent heat tolerance. **Thermal Blue** maintains an excellent turf quality under lower maintenance regimes.
